- Experience with CI/CD
- Proficient in Google Maps Integration and other Google API Technologies

PROFESSIONAL SKILLS

- Can work under pressure
- Good time management skills
- Quick learner
- Good communication skills

PROFILE

I am a graduate from Central Philippine University (CPU) with a degree in software engineering. I have extensive knowledge and experience in web development, mobile development, and testing. I am highly skilled in developing frontend for both web and mobile platforms, and I also have a strong set of abilities in conducting thorough testing to ensure quality.

PROFESSIONAL EXPERIENCE

Intern

Kingsland University | 2023

As an intern at Kingsland University, my primary role involved designing and developing websites tailored to meet the needs of their clients. I contributed significantly to projects such as student management systems and other web-based solutions, ensuring user-friendly interfaces and efficient functionality. This opportunity allowed me to hone my skills in web development, collaborate with diverse teams, and deliver impactful digital solutions aligned with client objectives.

Associate Software Engineer

Prometheus | 2024

As an Associate Software Engineer at Prometheus, I specialized in creating dynamic and visually appealing websites for clients, with a strong focus on frontend development. My role encompassed crafting user-centric designs, implementing responsive layouts, and ensuring seamless functionality across various devices and platforms. This experience deepened my expertise in frontend technologies and enhanced my ability to deliver impactful web solutions.

Senior Software Engineer

Prometheus | 2024 - Present

As a Senior Software Engineer at Prometheus, I have taken on a leadership role, guiding and mentoring my team to achieve their full potential. I focus on sharing best practices, fostering collaboration, and providing technical expertise to ensure the successful delivery of client projects.
